

Final Schedule

Scientific Meeting of the International Society for Research on Impulsivity

Date: **September 16, 2006**

Time: **11:00 a.m.-6:00 p.m.**

Location: **Paris, France**

2006 OFFICERS OF THE INTERNATIONAL SOCIETY FOR RESEARCH ON IMPULSIVITY

PRESIDENT	F. Gerard Moeller, M.D.
------------------	--------------------------------

AT LARGE EXECUTIVE MEMBERS
Franck Bayle, M.D.
John Evenden, Ph.D.
Brit af Klinteberg, Ph.D.
Larry Siever, M.D.
Alan C. Swann, M.D. (Executive Officer)
Christina Oyervides (Managing Secretary)
Matthew Stanford, Ph.D. (Secretary Treasurer)

About the International Society for Research on Impulsivity

The International Society for Research on Impulsivity is a nonprofit scientific society founded to promote research collaboration on impulsivity and impulse control disorders by scientists around the world.

The purpose of this society is to foster international research collaboration on impulsivity and its psychiatric and social consequences.

What is Impulsivity?

Impulsivity has been variously defined as human behavior without adequate thought, the tendency to act with less forethought than do most individuals of equal ability and knowledge, or a predisposition toward rapid, unplanned reactions to internal or external stimuli without regard to the negative consequences of these reactions.

Impulsivity is implicated in a number of psychiatric disorders including Mania, Personality Disorders, and Substance Use Disorders; yet, there is significant disagreement among researchers and clinicians regarding the exact definition of impulsivity and how it should be measured.

Impulsivity is also a key construct in many social decisions. For example, in jurisprudence, forensic psychiatrists often testify in mens rea decisions. If an alleged criminal act like murder is shown to be impulsive, the penalty is different than if it is premeditated.

The goals of this society include:

- 1) Establishment of guidelines for measurement of impulsivity which would make comparisons across research projects more meaningful
- 2) Examination of the current diagnostic criteria for disorders of impulse control based on results of biological, social, cognitive, and behavioral research
- 3) Dissemination of clinical and pre-clinical impulsivity research to other researchers and clinicians through symposia, publication, and newsletters.

INTERNATIONAL SOCIETY FOR RESEARCH ON IMPULSIVITY
Meeting Schedule

Saturday, September 16, 2006

11h00-11h10 Welcome remarks AFPB and Presidents :
Philippe Robert and F. Gerard Moeller

Session 1. Chairs Frederick Moeller (President) and Philippe Robert (AFPB President)

11h10 Launching a bridge between Eysenck's, Barratt's, Dickman's and Gray's
impulsivity constructs.
Hervé Caci

11h30 Neurocircuitry and Neuropsychopharmacology of Impulse Control Disorder.
Eric Hollander

11h50 Alterations in Motor Control as Correlates of Impulsivity in Psychiatric Disorders.
Mathias Lemke

12h10 Towards a Pathophysiology of the Impulsive Aggressive Personality Disorders
Larry J Siever

12h30 : walking lunch

Session 2. Chairs Eric Hollander (President elect) and Olivier Blin (AFPB Past President)

13h50 Pro-bullying attitudes among incarcerated juvenile offenders: The relation to
delinquency, aggression, psychopathy, and violence.
Gunnar Wiklund, Vladislav V. Ruchkin, Britt af Klinteberg

14h10 Impulsivity, eating habits and cortisol stress responses.”
P. Netter

14h30 Behavioral Measures of Impulse Control Predict Response to Treatment in
Cocaine Dependence.
F. Gerard Moeller, Joy M. Schmitz, Joel L. Steinberg, Charles M. Green,
Christopher Reist, Lingo Y. Lai, Alan C. Swann

14h50 Disinhibition and reward sensitivity as predictors of relapse in pathological gambling.
Anna E. Goudriaan

15h10 N-Acetyl Cysteine Treatment of Pathological Gambling
Jon E. Grant

15h30 : break

Session 3. Chairs Britt af Klinteberg (executive officer) and Franck Baylé (AFPB Scientific secretary, executive officer)

16h00 Impulsivity mediates interactions between course and episode characteristics of bipolar disorder.
Alan C Swann, Joel L Steinberg, F Gerard Moeller

16h20 Inhibition and stroop emotional in schizophrenic patient and bipolar patient.
Nathalie Besnier

16h40 Discounting QALMs (quality adjusted life minutes).
Peter Polister

17h00 Adolescents with Suicide Attempts and/or Non-Suicidal Self-Injurious Behaviors: Clinical Symptoms and Behavioral Impulsivity.
Donald M. Dougherty, Charles W. Mathias, Kristen N. Prevetie,
Dawn M. Marsh, Stephanie Daniel

17h20 Decision Making Impairment: an endophenotype in suicidal behavior
Ph Courtet

17h40 Conclusion: Britt af Klinteberg and Franck Baylé

17h50-18h00 AFPB-PFIZER 2005-2006 best communication awards
